13th - 17th October 2013

PRESENTATION

Natural Mineral waters and climatic resources are part of the cultural heritage of every country's medical tradition. Hippocrates, "the Father of Medicine", wrote the "handbook" "On Airs, Waters and Places", very modern and topical. It dealt with connections between human being and environment and the opportunity of natural means care. Holistic and integrate vision provides four principal implements: hydrothalamotherapy, movement, nourishment and relationship mind/body. So the choice of Congress site is to underline the important and topical Hippocratic teaching about prevention, treatment and rehabilitation, wellbeing.

Referring to the Congress sites (Rhodes and Kos) there will be a special session about thermalism history of FEMTEC Members Countries.

During the Congress, ceremony of Hippocrates Oath will take place in Asclepeion.

Pr. Umberto Solimene
